Proposal and technical specifications for the LED Multi Sport Outdoor Scoreboard

LED Scoreboards manufactured by Technocratz are available in a variety of sizes starting from 15" x 30", 2 x 3 feet to large full-color screens of 12 x 18 feet and above which can run score as well as videos. Most of our Scoreboards operate from Keypad with wire or wireless. The Outdoor LED scoreboards are fully rainproof and visible in daylight. The front of the Outdoor Scoreboards is covered with an unbreakable 3mm polycarbonate sheet with laminated vinyl print where you can have the Institute / Club / Unit / School / Stadium name in print with the logo.

Technocratz LED Scoreboards use the P10 LED modules and not the general local digits which are assembled manually. These modules have the LED, IC, and the components mounted by machines on double-sided glass epoxy PCB and made waterproof using silicon and fixed onto high grade plastic frame making them shockproof and virtually maintenance-free. The Scoreboard is made up of 100% rainproof MS powder-coated housing with the front covered with an Unbreakable transparent polycarbonate sheet having a laminated attractive print. The Scoreboard electronics consists of 3 basic components i.e. the **LED modules** of 6 x 12" each powered by **SMPS** connected and the microcontroller-based **motherboard**. The scoreboards are manufactured maintaining high standards hence the chances of defect are minimal, still if a fault occurs, these components are connected via connector based FRC ribbon cable, and the 5-volt power too has connectors which makes the scoreboard modular and easy to maintain.
